Continuation of 11. does NOT place the application in condition for allowance because: of the reasons set forth in the prior office action. Particularly, In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Applicant's attention is further directed to *KSR vs. Teleflex*, where the court states:

"When there is a design need or market pressure to solve a problem and there are a finite number of identified, predictable solutions, a person of ordinary skill has good reason to pursue the known options within his or her technical grasp. If this leads to the anticipated success, it is likely the product not of innovation but of ordinary skill and common sense." The prior art teach that tramadol (an atypical opioid) is known to be used with a NSAID for treatment of pain, and Ketorolac (a NSAID) is known to be used for treatment of with an opioid. One of ordinary skill in the art would have motivated to combine tramadol and ketorolac for treatment of pain with a reasonable expectation of the synergistic benefit known in the art.
